Lunar soil - Wikipedia
Lunar soil is the fine fraction of the regolith found on the surface of the Moon. Its properties can differ significantly from those of terrestrial dirt. The physical properties of lunar soil are primarily the result of mechanical disintegration of basaltic and anorthositic rock, caused by continual meteoric impacts and bombardment by solar and interstellar charged atomic particles over

7 Dimension 3: Disciplinary Core Ideas - Earth and Space
Connecting the ESS to the intimate scale of human life, this idea explains how Earth’s processes affect people through natural resources and natural hazards, and it describes as well some of the ways in which humanity in turn affects Earth’s processes. See Box 7-1 for a summary of the core and component ideas.

Winter Weather | Ready.gov
Jan 11, 2022 · Learn how to prepare for winter weather, survive during winter weather, and be safe after winter weather. Prepare for Winter Weather Stay Safe During Associated Content Winter storms create a higher risk of car accidents, hypothermia, frostbite, carbon monoxide poisoning, and heart attacks from overexertion. Winter storms including blizzards can bring ...

erosion | National Geographic Society
Most erosion is performed by liquid water, wind, or ice (usually in the form of a glacier). If the wind is dusty, or water or glacial ice is muddy, erosion is taking place. The brown color indicates that bits of rock and soil are suspended in the fluid (air or water) and being transported from one place to another. This transported material is called sediment.

Pay Plans :: VBgov.com - City of Virginia Beach
Due to anticipated weather conditions throughout the weekend, the City will remain closed and under essential operating conditions through Sunday, January 23 at 8 a.m.

Erosion - Wikipedia
Rainfall, and the surface runoff which may result from rainfall, produces four main types of soil erosion: splash erosion, sheet erosion, rill erosion, and gully erosion. Splash erosion is generally seen as the first and least severe stage in the soil erosion process, which is followed by sheet erosion, then rill erosion and finally gully erosion (the most severe of the four).
particular time and place: the temperature and other outside conditions (such as rain, cloudiness, etc.) at a particular time and place. See more meanings of weather. How to use weather in a sentence.
